SAVE YOUR PENNIES INSTRUCTIONS

Congratulations on receiving your very own Piggy Bank. Below are detailed step-by-step instructions to completely fold and put together the complete box. No extra pieces of sticky-tape, glue or staples are required. If you battle following the instructions or would like to get a better look at how to fold it, visit our website at www.myfaithtv.com, click on the Piggy Bank link and follow the full 'How to' tutorial.

STEP 1

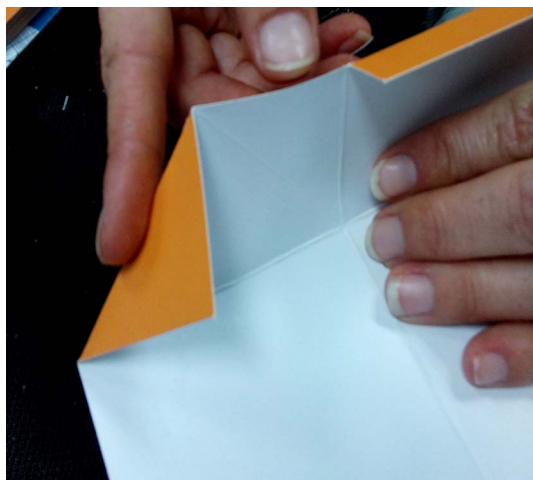

The first step is to pop out the little cut out section where the coin will be dropped in. Just push it out using your finger and snap it off at the back.

STEP 2

Secondly, turn everything upside down and fold the box on all the "pre-folded" lines, making sure that all flaps are folded inwards.

STEP 3

Fold in the little corner on the edge of the one side and make sure that all the "triangle" flaps are also folded inwards using the pre-pressed fold lines.

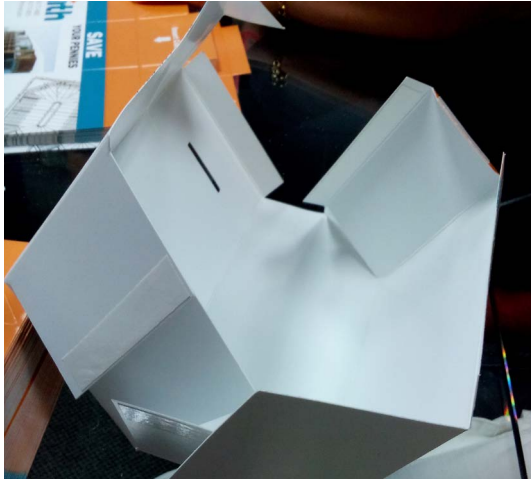

STEP 4

Remove the protection layers off the double-sided sticky tape on the long edge of the side of the box. You can also remove the one shorter piece but can be done later.

SAVE YOUR PENNIES INSTRUCTIONS

STEP 5

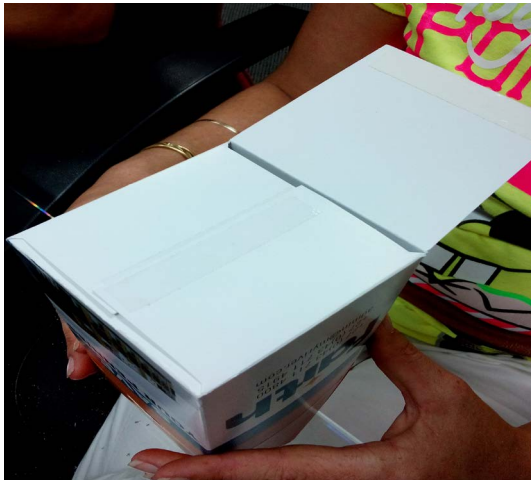

Fold the box together, combining the 2 edges, now forming the shape of the box and stick the flap with the double-sided tape on underneath the other edge of the box. You will now have a box with flaps still open.

STEP 6

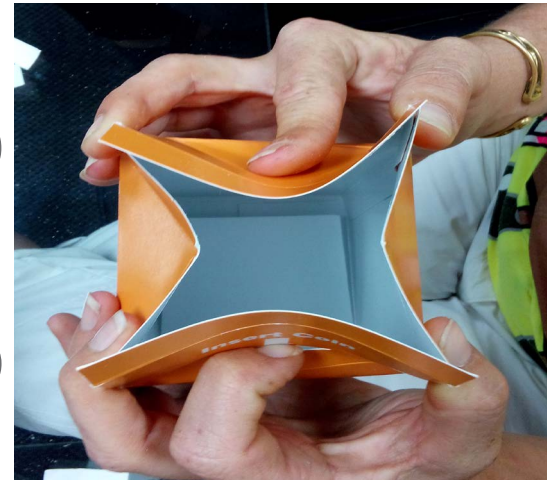

If you did not remove the little piece of double-sided tape in step 4, remove it now and also stick it down on the little flap above it.

STEP 7

Now remove all the double-sided tape from the bottom flaps and stick together. The correct way is to fold the 2 smaller flaps together first, then the one long flap with no tape and lastly the long flap with a piece of tape on it.

STEP 8

Almost done! Hold your Piggy Bank so that you are looking at it from the top - don't remove the last piece of tape yet. Using all fingers and thumbs, push the top piece together so that all folds are folded inwards.

STEP 9

Lastly, remove the tape on the very top flap section and carefully push the 2 top flaps together as shown. Once these are stuck down, you will have your completed and ready to use Piggy Bank!
